MANUFACTURER OF DISPLAY SHOWCASE

PACKAGING

Most of the models can be flat pack and put into a portable crate. Even the tower displays which height is about 2m, we can split it into two sections, knock them down and put them into the box. The plywood box is foldable because all panels are connected by piano hinge and latch lock., no need to use tools. The handle makes it easy to be moved. We can also add casters underneath to make it easier to move around. It is very useful to participate in exhibitions.

ALUMINUM FRAMED TOWER DISPLAYS

SWC500TC

SWCCN1TC

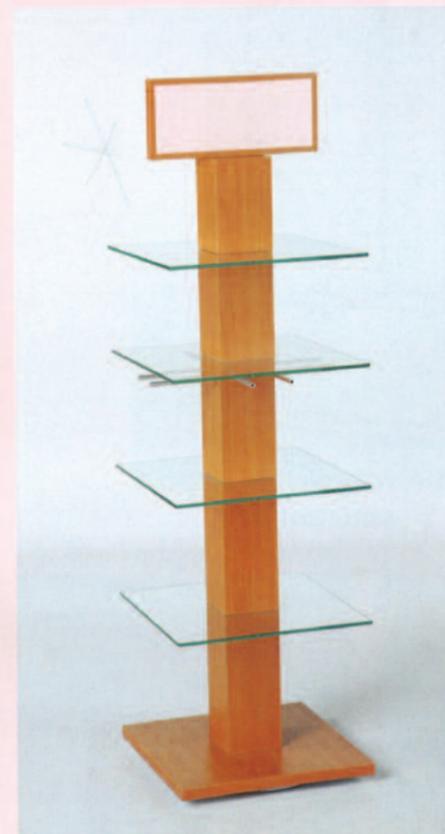

SWC1000TC

OPENING SHELF DISPLAY

These two knock-down displays are flat pack. The wood blocks and glass shelves are combined together by two poles at the center. The GD14 has a lazy susan underneath and revolves. They are suitable for boxed merchandise like watches, digital products. The header is a good place for branding.

Many colors are available such as cherry, beach, oak, maple.

GD14

Standard:

- Tempered glass
- melamine finishing base
- revolving

Dimensions:

- 356(W)X356(D)X1149(H)mm

GDWC18

Standard:

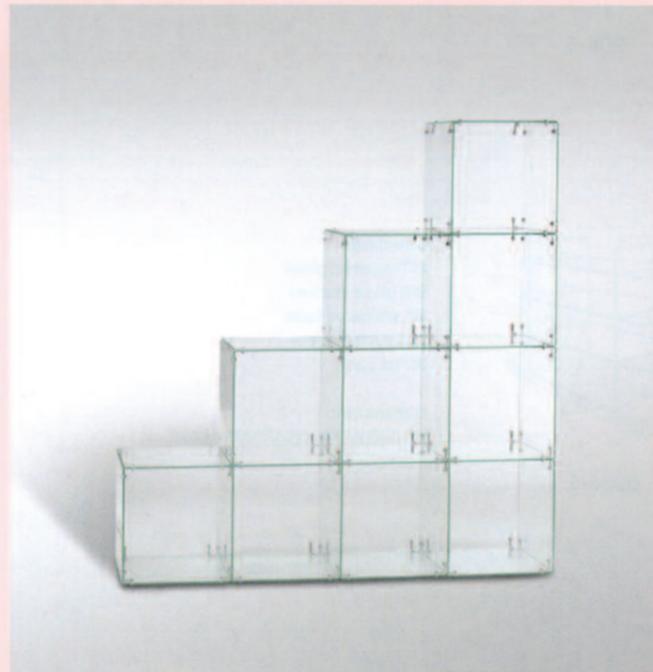

- Tempered glass
- melamine finishing base

Dimensions:

- 457(W)X457(D)X1955(H)mm

MAGIC GLASS CUBE

The glass cubes are quite magic. The standard size is 350 X350mm(13-3/4 X 13-3/4inch) square. All the glass panels are of the same dimension and connected by two kinds of bracket only. It likes toy bricks and can be constructed very easily. It is very economy and flexible. You can change the shapes easily.

SWC400TC

- Standard:**
- Tempered glass
 - 5x20 watt halogen lights, 1 at top and 4 at side
 - 3 adjustable glass shelves
 - Locking hinged glass door (security lock)
 - Storage with hinged door (security lock)
 - Plug and switch
 - Adjustable feet
- Dimensions:**
- 400(W)X400(D)X1980(H)mm

JEWELLERY SHOWCASES

Allpower has full range of jewellery displays including counter, cashier, free standing tower display, wall units, wall mounted showcases. All of them are standard size and can be combined easily. What you do is just to choose the idea ones from the range and put them together, saving time and money of design. And you can do the installation by yourself because all of them are standard size. Each one has plug. You just plug them and the lighting works.

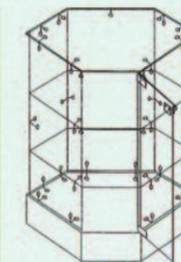

Wood veneer can be Oak, Maple, Beach, Cherry or the one you suggest.

Lighting can be halogen light, fluorescent and LED.

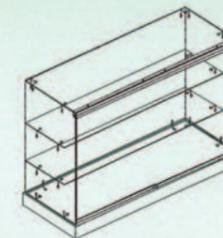

GCT3W12

- Standard:**
- Tempered glass
 - 2 fixed glass shelves
 - Sliding glass doors with lock (push lock)

EXHIBITION SHOWCASES

Allpower portable showcases are idea showcases for exhibitions. There are counters and tower showcases for your choice. We knock the showcases down and put them tightly in strong transportation cases. There are strong wheels underneath for you to move them around easily. The twist lock with butterfly latch and set-in hinges and locks make each side of the cases flat for you convenience to store, carry and check.

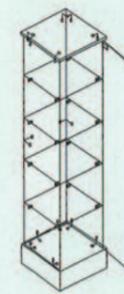

The RTA design makes it easy to put them together. There is not any small bracket like screw, nut. It is very easy for you to assemble it for they are tool-less design. You just finish the assembly by hands. The normal time to put a showcase together would be within 20min if you are practical.

The same way to knock the showcase down once exhibition is over. The time cost to knock it down is less than to put it together because you are familiar with the structure at that time. You can leave straight away after you put all the pieces into the box, no need to wait the packaging material back your booth.

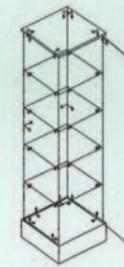

EXCT1

- Standard:**
- Tempered glass
 - 4x20 watt side halogen lights
 - Sliding glass doors (push lock)

Night light displays are special for the low power consumption lamps. There are many sockets on the panels and it can showcase your night lights made from ceramic, glass, plastic or other materials. The light source can be energy saving bulbs or LED. The max height of lamp can be 10 inches. The revolving one can make it easier for customer to choose.

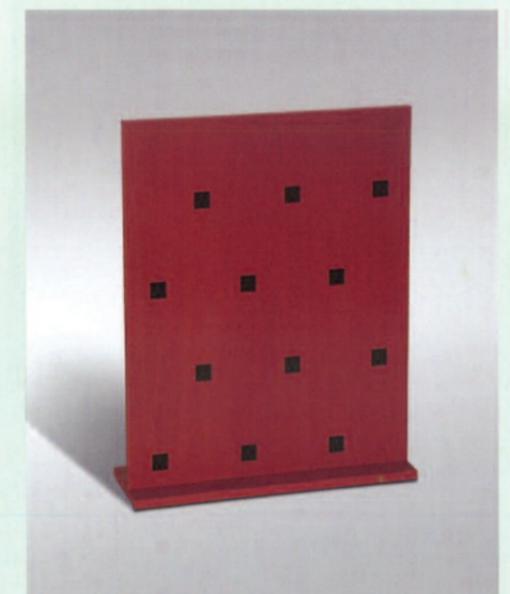

There is a cord with plug. A fuse limits the total power consumption preventing from overload.
